

## UP TO THE TEST

### TRT :20 SCRIPT

At Woods<sup>®</sup>, we know you measure progress in acres, so you can't afford to lose daylight to downtime. That's why we put every tractor mounted attachment through the toughest scientific and real-world tests.

To be sure you get performance that keeps you in the field. Woods. Get After It.

Suggested :10 Dealer Copy

From Batwing cutters to rotary tillers, backhoes, and finish mowers, you can bet there's a Woods attachment for the next job on your list. Visit [DEALERSHIP INFORMATION] to see our complete line of Woods tractor-mounted attachments.

## UP TO THE TEST

### TRT :30 SCRIPT

What does it mean to be up to the test? At Woods<sup>®</sup>, it means being able to withstand a lifetime of work. We know because we test our tractor attachments, like the Woods Batwing<sup>®</sup> rotary cutter, to simulate a lifetime of wear and tear.

Then, we make them cut things in the field we'd never ask you to cut. And if there's an opportunity to make our products even better, we take it. Because if they're up to our test, they'll be ready for anything you're up against. Learn more at [Woodsequipment.com](http://Woodsequipment.com). Woods. Get after it.
